

Razir Transport Services Ltd. (“Razir Transport”) Corporate Responsibility Policy

Razir Transport is committed to growing responsibly and ensuring that we are a sustainable transportation provider. This policy provides the foundation of our approach to the environment, our people and the customers we serve. It is supported by specific policies, procedures or codes pertaining to driving practices, procurement, health and safety, employment, and business ethics.

Safety

We are committed to safety for our drivers, cargo and others on the road. We operate a new and well maintained fleet that meets safety and environmental standards. We train our drivers thoroughly and monitor safety performance.

Our People

Our drivers and other staff keep Razir moving. We commit to providing them with a healthy, safe and respectful work environment that is also free from all forms of harassment or discrimination. We communicate our expectations through our code of conduct and other policies and we provide the training employees need to be successful.

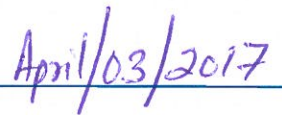

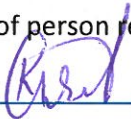

Fair business

We are service driven. We value clear communication, honesty and respect with our clients, suppliers and business associates. We also ensure that there is proper documentation for any loads we transport.

Environment

We are a growing company and we recognize that as our operations grow, there is a tendency for our environmental footprint to do so too. To counter this trend, we seek opportunities for greater efficiency that also benefit our business and our clients. We commit to meeting the requirements of environmental regulations at a minimum and improving our environmental practices through regular monitoring of results and review of policies.
